Byron Bay World Premiere Groundbreaking New Understanding Of Human Nature

Byron Shire, NSW - Two local luminaries, who have pioneered a cutting-edge new Model about human nature and consciousness, will be presenting it at a world premiere at the Byron Theatre on Wednesday February 18, at 6pm.

Mullumbimby thought-leaders Allen David Reed and Tahnee Woolf have developed 'The Ten Terrains Of Consciousness', a comprehensive and insightful model that reveals the ten different paradigms that co-exist on this planet. According to Reed and Woolf: *“Every single person alive today is at one of these ten Terrains of Consciousness. Our Terrain creates all our perceptions, thoughts, beliefs, choices, actions and behaviours, both as individuals and as nations”*.

The Ten Terrains Model arose out of the combination of Reed and Woolf's extensive backgrounds. Native Californian Allen David Reed is an 'encyclopedia of knowledge' with expertise in architecture, technology, virtual reality, physics, philosophy, history, the esoteric sciences, dowsing and shamanism. Australian Tahnee Woolf is an inspirational speaker who has been a corporate lawyer, Oxford scholar, screenwriter, radio host, personal development coach, workshop facilitator, environmental change agent and Feldenkrais Practitioner.

When Allen and Tahnee moved to Mullumbimby two and a half years ago, they thought they would be birthing a baby... Little did they know that instead they would be birthing an entirely new body of work that explains humanity's spiritual journey of evolution! They are delighted to be unveiling the Ten Terrains Model right here in the Byron Shire before sharing it with the rest of the world.

In a two-hour multi-media Presentation at the Byron Theatre on Wednesday 18 February at 6pm, Allen and Tahnee will be thoroughly explaining their 'Ten Terrains of Consciousness' Model. They will discuss the Terrain of Consciousness in Byron Shire that makes life here so different from the rest of Australia. They will also share how a person's Terrain of Consciousness affects every aspect of their life, from their career, relationships and health, to their sense of self. The Presentation will be followed by a Q&A, where members of the community can get answers to their deepest questions.
